October 25, 2009

Mr. Whitney Waugh,

I want to take this opportunity to thank you and your crew for the excellent job they have done on topping off both of our LNG Tanks with perlite. Your crew is the most knowledgeable crew that we have had on site performing this type of work and has exceeded our expectations regarding safety. They are very professional in performing their work and have been a pleasure to work with. I would highly recommend Amol Cryogenic to anyone else for this type of work as you have provided us with a very quality job. In the future should we require additional perlite I would recommend that we utilize Amol Cryogenic. Once again, please pass this along to the crew that I am very appreciative of the great job they have done for Pine Needle LNG.

Very truly yours,

Jim Raschke, P.E.  
Pine Needle LNG – District Manager
